LONG SUBDIVISION – PRELIMINARY APPROVAL

A Long Plat (or Long Subdivision) is any subdivision of five (5) or more lots. The Long Plat application review is to ensure that a proposed land division is designed and developed in accordance with the City of Mercer Island’s adopted rules and standards. The proposal must be consistent with the protection of the public health, safety, welfare, and aesthetics, and provide for adequate public services and infrastructure.

REVIEW PROCESS – TYPE IV LAND USE REVIEW

Type IV reviews require discretion and may be actions of broad public interest. Decisions on Type IV reviews are only taken after an open record public hearing. Type IV reviews require a pre-application meeting, letter of complete application, notice of application mailing and posting, a 30-day public comment period, public hearing, notice of decision, and the decision is made by the Hearing Examiner or Design Commission.

PRE-APPLICATION MEETING

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

For more information on the Pre-Application Meeting process, please refer to the [Pre-Application Meeting Request Form](#).
