SHORELINE VARIANCE PERMIT

A Shoreline Variance Permit is strictly limited to granting relief from specific bulk, dimensional or performance standards set forth in the city's shoreline master program (SMP), MICC 19.13, where there are extraordinary circumstances relating to the physical character or configuration of property such that the strict implementation of the master program will impose unnecessary hardships on the applicant or thwart the policies set forth in RCW 90.58.020.

If construction authorization is required, separate permits must be obtained.

REVIEW PROCESS – TYPE IV LAND USE REVIEW

Type IV reviews require discretion and may be actions of broad public interest. Decisions on Type IV reviews are only taken after an open record public hearing. Type IV reviews require a pre-application meeting, letter of complete application, notice of application mailing and posting, a 30-day public comment period, public hearing, notice of decision, and the decision is made by the Hearing Examiner or Design Commission.

The applicant shall not begin construction until after 21 days from the date of filing with the department of ecology and Attorney General and/or any appeals are concluded. The applicant shall also comply with all applicable federal, state and city standards for construction.

The final decision in approving, approving with conditions, or denying a shoreline conditional use permit or shoreline variance is rendered by the department of ecology in accordance with WAC 173-27-200, and all other applicable local, state, or federal laws. The city shall send the shoreline permit and documentation of final local decision to the applicant, the department of ecology, the Washington State Attorney General and to all other applicable local, state, or federal agencies. The decision shall be sent to the department of ecology by return receipt requested mail or as regulated by WAC 173-27-130.

PRE-APPLICATION MEETING

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

For more information on the Pre-Application Meeting process, please refer to the <u>Pre-Application Meeting Request Form</u>.
